

Product Overview

Introducing Solstice Conference

A new class of agnostic room system that enhances video conferencing with rich content sharing.

The Ultimate Collaboration Solution for the Hybrid Workplace

Agnostic Room Conferencing

Connects Zoom, Teams, and other conferencing apps running on users' laptops to the room, providing seamless support for all major conferencing platforms.

Wireless USB Connectivity

Users engage and control the room technology from their own devices, improving room usability and hygiene while reducing cost and complexity.

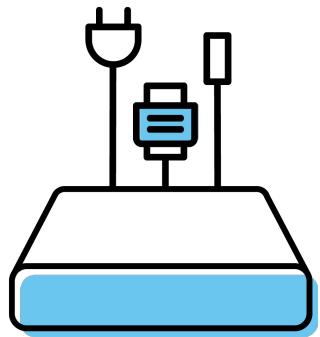

One-Step Start

A simple, one-step start delivers the convenience of a traditional room system with the flexibility to use the conferencing service of choice.

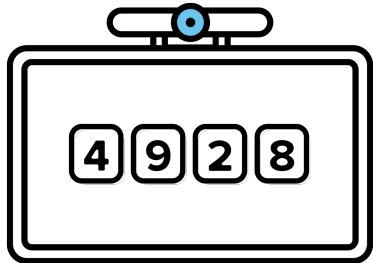

How it Works

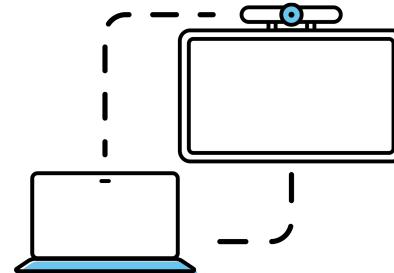

1. Simple Room Setup

The Solstice Pod attaches to the local WiFi/Ethernet network, room display, and room audio/video peripherals.

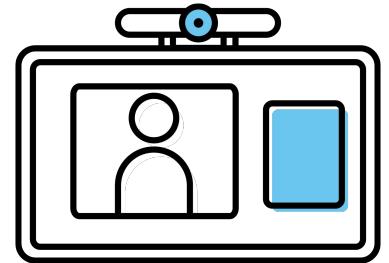

2. Touchless One-Step Start

On their laptops, meeting hosts simply enter the 4-digit PIN visible on the room display to auto-launch the scheduled web conference.

3. Wirelessly Connects the Room Technology

When the meeting starts, Solstice automatically connects the room display, camera, and audio to the meeting host's laptop running the Zoom (or other) meeting.

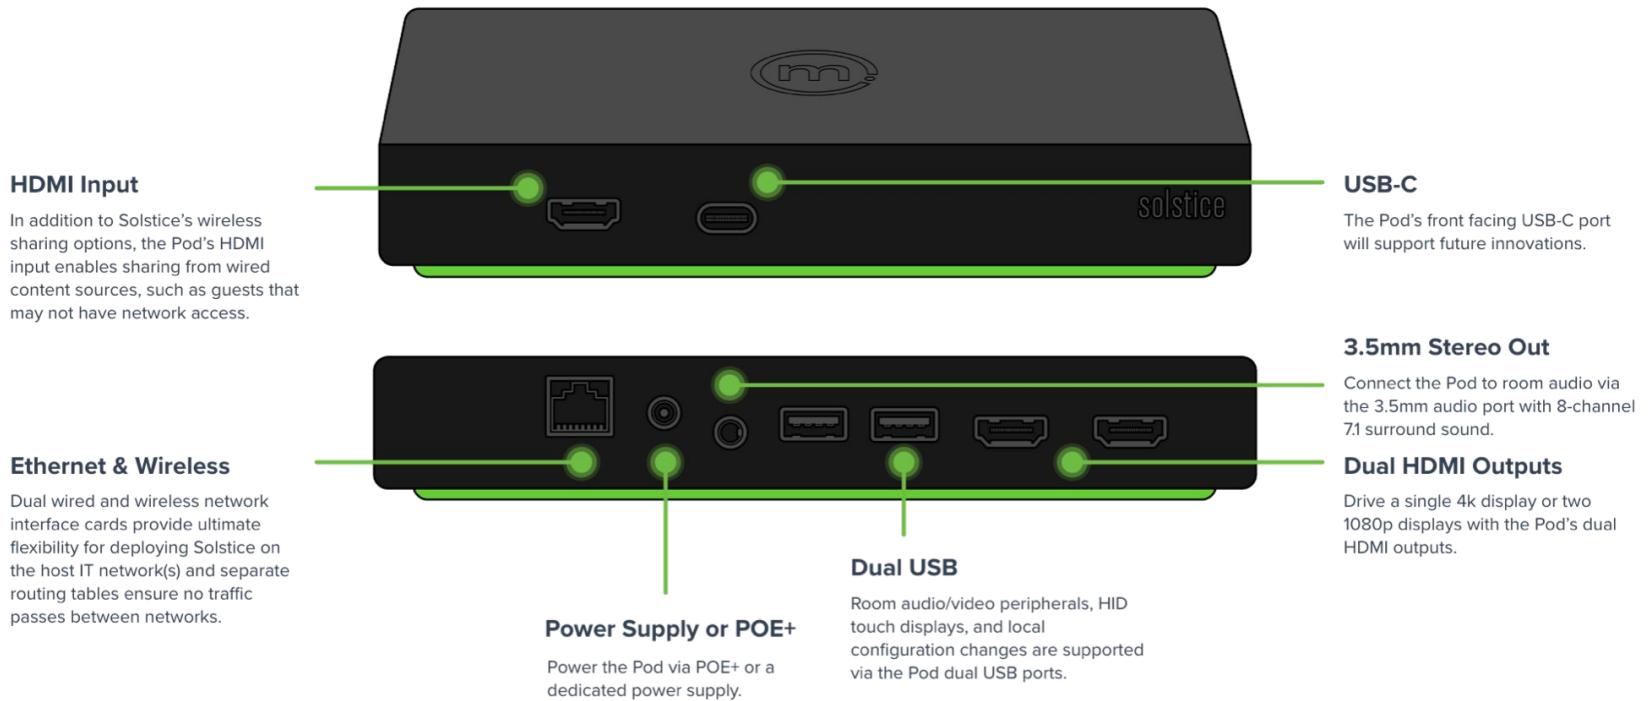

4. Enjoy Better Collaboration

Multiple users can share, arrange, and markup content simultaneously for more engaging and productive meetings.

Meet The Solstice Pod

Through powerful software-based capabilities and a flexible I/O hub, the Solstice Pod delivers new levels of collaboration in every meeting and learning space.

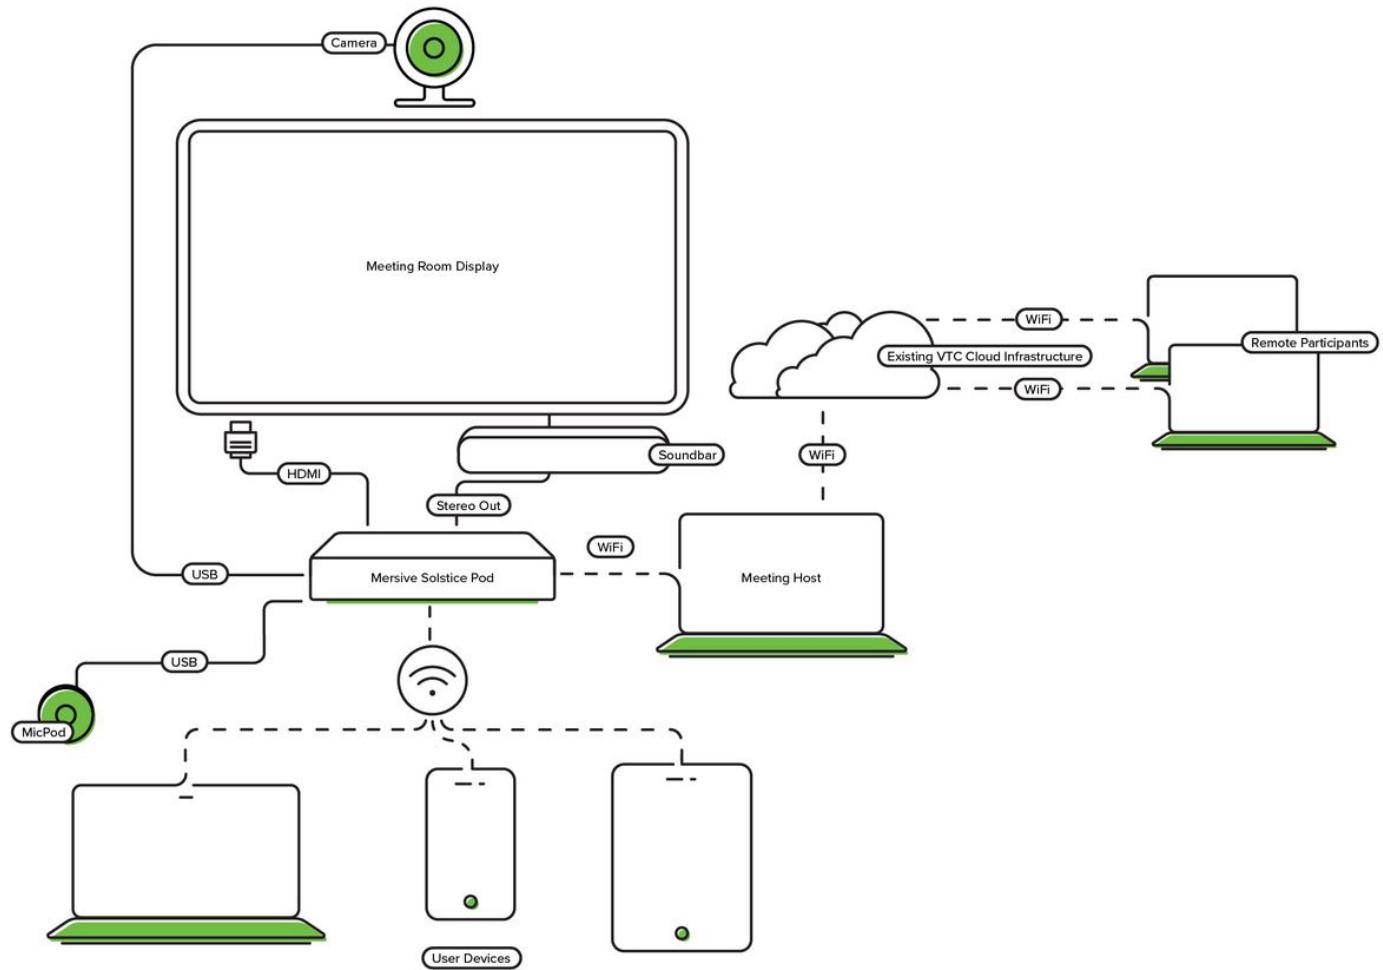

One Platform for Any Meeting or Learning Space

Solstice Conference Setup

- Gen3 Solstice Pod w/ current Solstice Subscription
 - Must be connected to Ethernet (internet access required)
- Meeting host laptop w/ 3rd-party conferencing app installed
- Solstice app (only req'd for meeting host)
 - In-room users can share via app, AirPlay, Miracast, HDMI input, or browser-based sharing
- Solstice Discovery Service (SDS)
- USB room camera and/or audio devices
- Room or personal calendar integrations (optional)

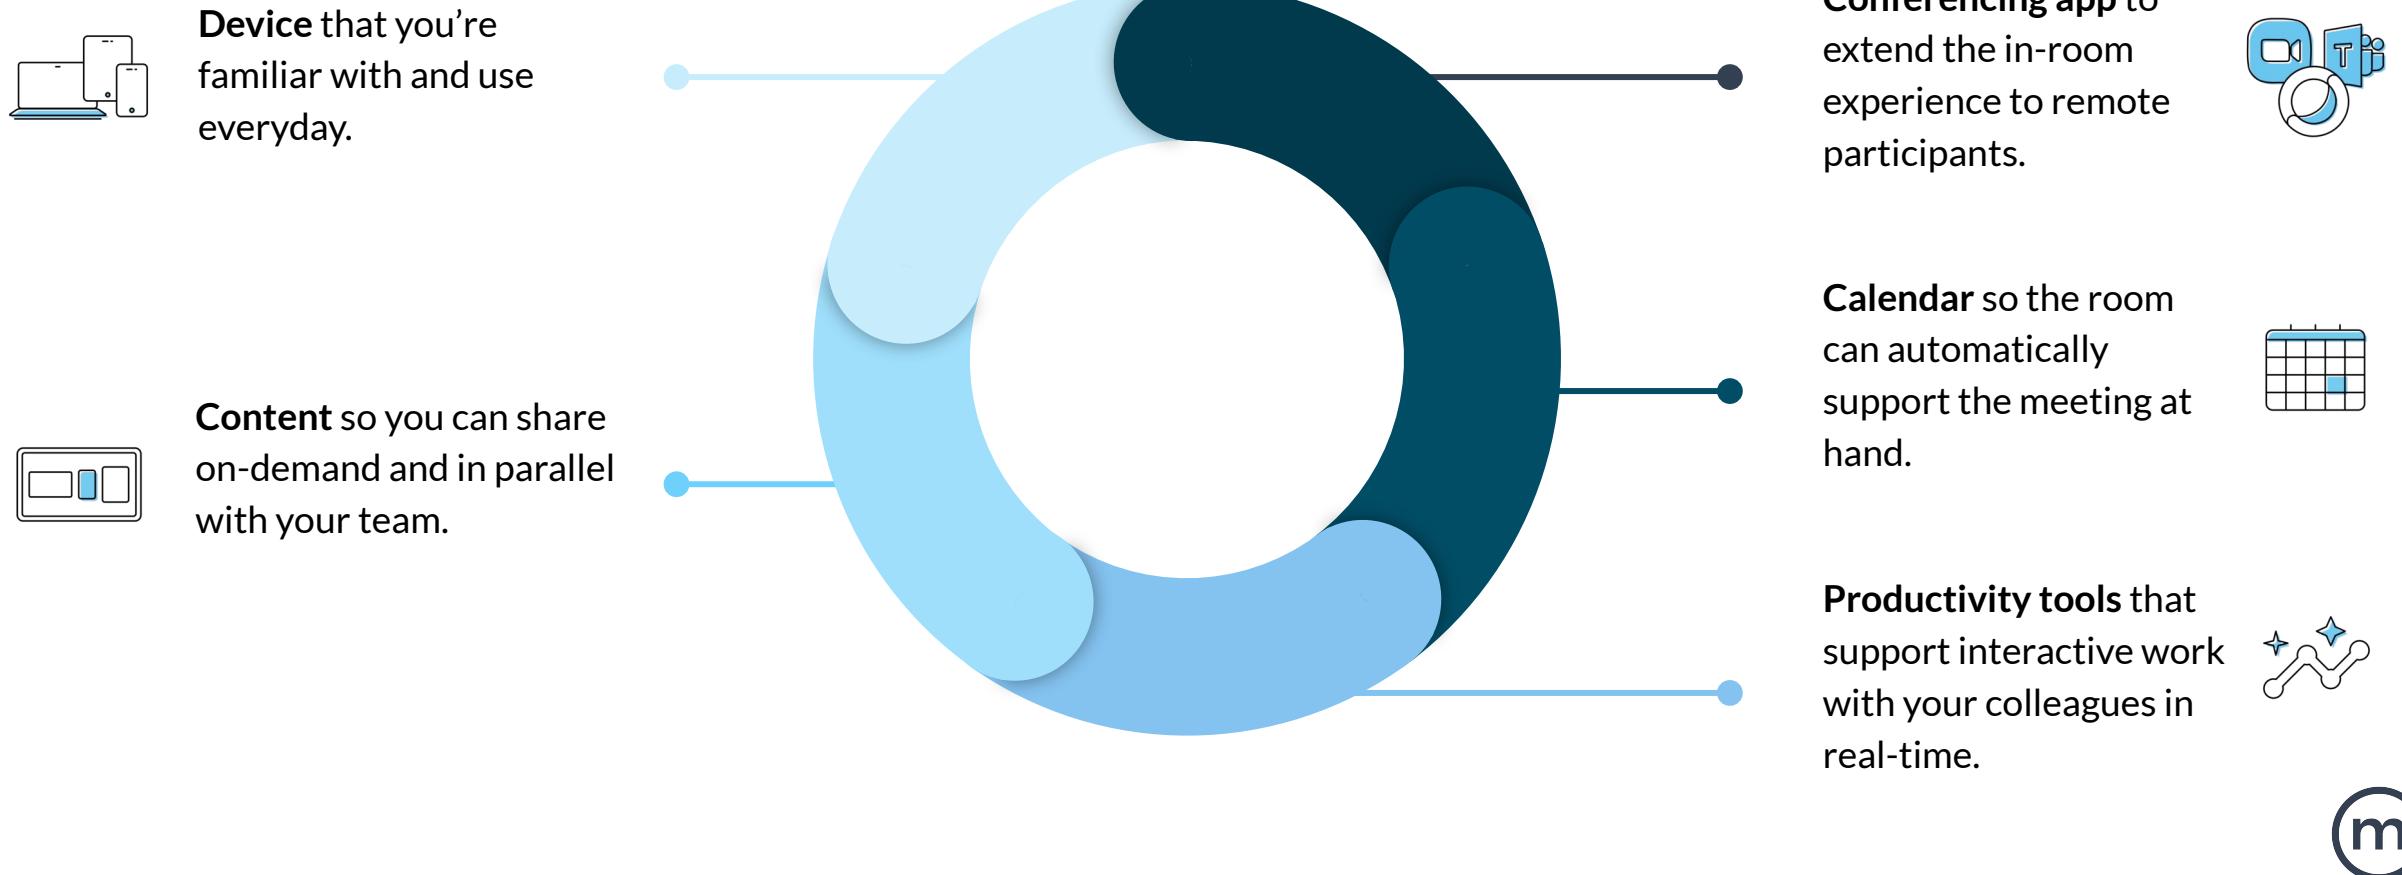

Enter The Era of Bring Your Own Meeting

Solstice turns any room into a Zoom, Teams, and Webex room by wirelessly connecting the conferencing services on users' laptops to the room technology.

- The room system should support all video conferencing applications to the room.
- Reduces the management and support footprint, and puts the value of the room where it should be.

Defining Bring Your Own Meeting (BYOM)

By leveraging everything the users bring into the meeting room on their devices, Solstice delivers a touchless, easy-to-use room solution that is driven completely by users' own device.

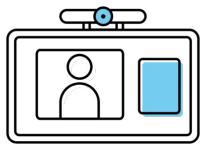

Much More Than Conferencing

Get the most out of your meeting spaces with digital signage playback, conferencing analytics, intelligent room occupancy detection, calendar support, dual display support, and more.

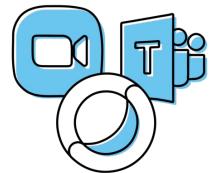

Key Advantages Over Traditional Room Systems

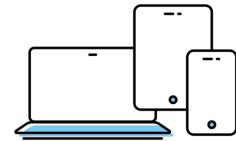

Solstice provides a more collaborative meeting experience that offers ultimate user choice and flexibility while reducing room cost and complexity.

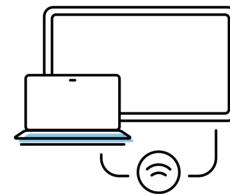

Enhances conferencing with
multi-participant
collaboration

Supports all video
conferencing applications
brought to the room

Touchless room solution
that is driven completely by
users' own devices

Avoids unnecessary
bandwidth costs by utilizing
local networks for in-room
content sharing

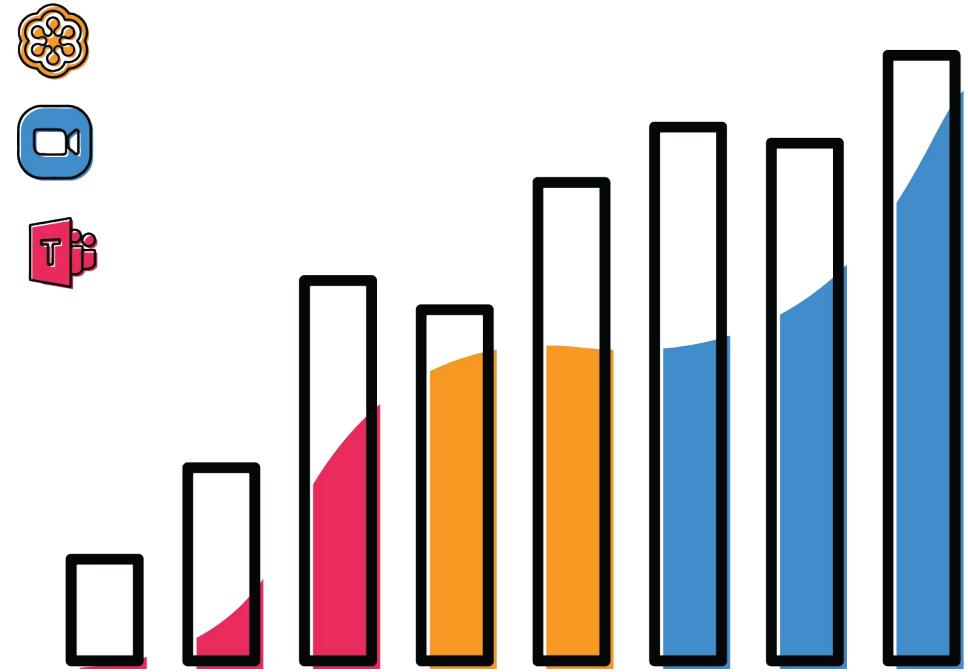

More affordable with a
lower total cost of
ownership

Insights into Workplace Collaboration

Gain insights into room utilization and conferencing analytics to better understand users' needs and inform workplace strategy.

Key Capabilities

Agnostic Room Conferencing

Solstice connects Zoom, Teams, and other conferencing apps running on users' laptops to the room technology, providing seamless support for all major conferencing platforms in meeting and learning spaces.

Wireless Connectivity

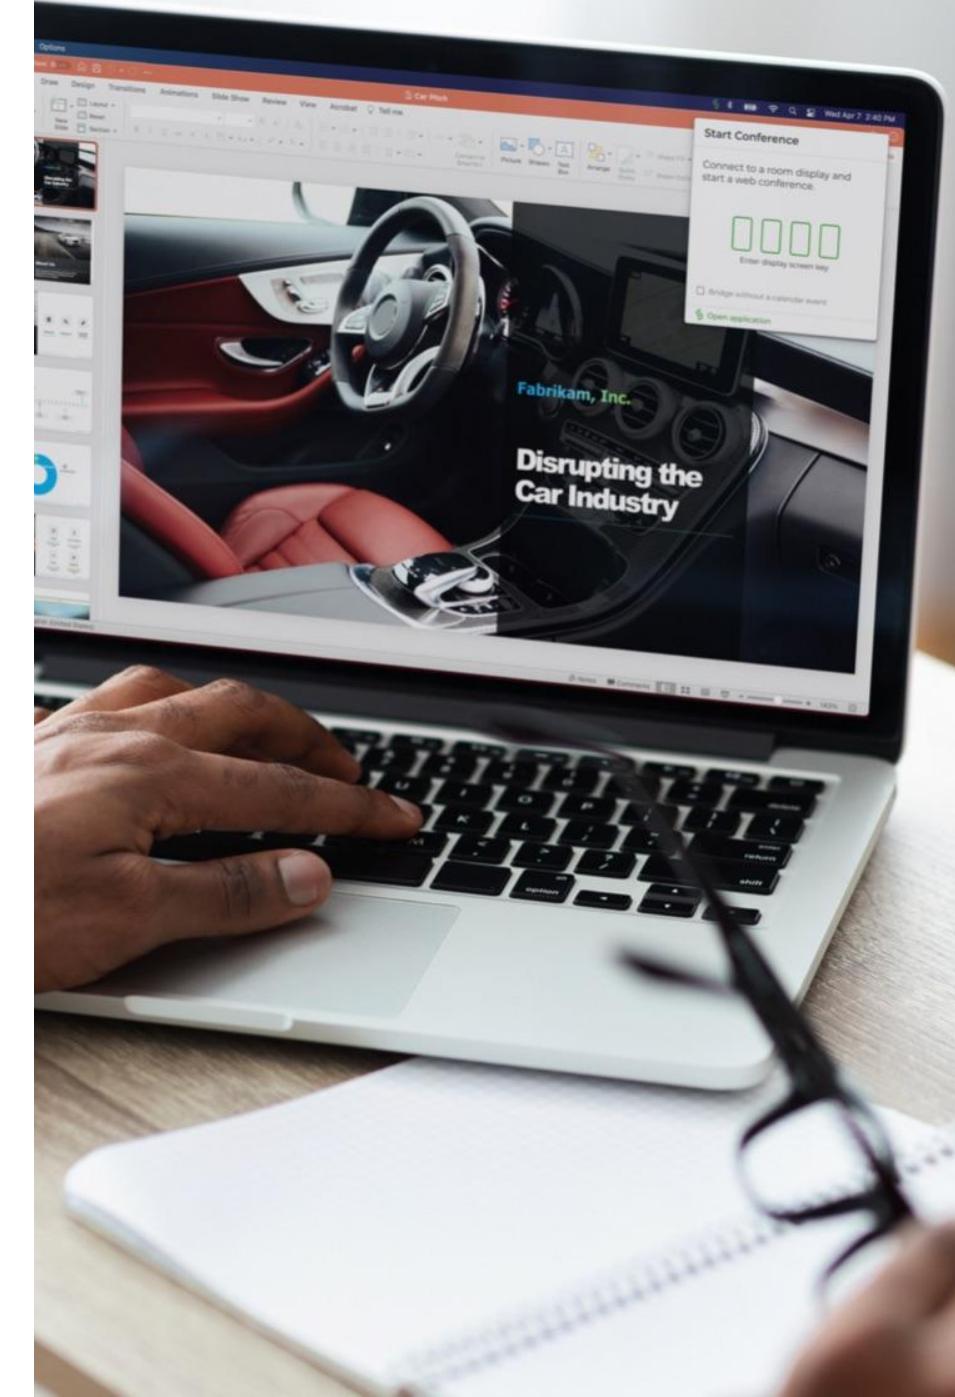

Solstice wirelessly connects user devices to the room display and room peripherals (cameras, mics, etc) that are attached to the Solstice Pod via USB.

The result is a completely touchless meeting experience where users engage and control the room technology from their own devices, improving room usability and hygiene while reducing cost and complexity.

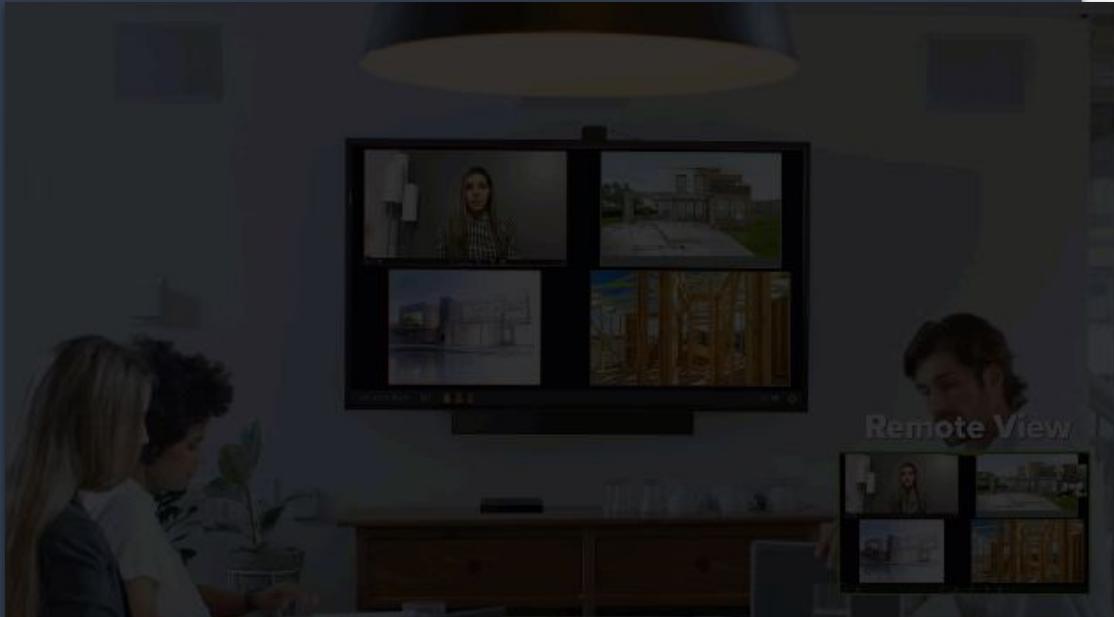

One-Step Start

Through room and personal calendar integrations combined with intelligent software-based workflow automation, Solstice Conference provides a simple, one-step start regardless of which conferencing service is used, delivering the convenience of a traditional room system with the flexibility to use the conferencing service of choice.

Rich Content Sharing

Solstice enhances traditional conferencing with multi-participant content sharing, control, and markup, improving the collaboration experience between onsite and remote participants.

Solstice Conference Demo

Solstice Conference is Now Available!

General Availability

- Now available for Gen3 Solstice Pods!
- Included as part of a Solstice Subscription
- New customers get Solstice Conference free for a year with a new Gen3 Pod purchase
- Room audio/video peripherals sold separately

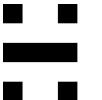

Existing Customers

Existing customers with a current Solstice Subscription can enable Solstice Conference for their Gen3 Pods by upgrading to Solstice version 5.3. Current Solstice Subscription is also needed to utilize the service once the software update has been installed.

Alliance Partner Room Solutions

Built to equip any meeting space, these easy-to-install room solutions combine all the benefits of Solstice Conference with the industry's leading conference room peripherals to deliver complete collaboration solutions.
